Python, C++, Scikit-learn,  
JavaScript, SQL, R Programming

Excel, My SQL, Postgres

**Visualization:** Tableau, Matplotlib,  
Seaborn, Potly (Express)

### Natural Language Processing:

NLTK, spaCy, Gensim etc.

### Machine Learning, Data

Cleaning, Statistic, Data Handling,  
Pattern Recognition

---

## PROFESSIONAL EXPERIENCE

### MedTourEasy

Aug2023 - Sept2023

#### Data Analyst Trainee

working on real-life projects during your internship can be an incredibly valuable experience. It provides you with practical skills, exposes you to real-world challenges. MedTourEasy focuses on studying **the difference in death age between left-handers and right-handers**. Working with a **10GB dataset** for data cleaning, data collection, data analysis, statistical testing, **machine learning algorithm** and data visualization is a substantial task.

### TrackYourCareer

Jun2023

#### Data Analyst Intern

**Admissions Trend Analysis** conducted in-depth analyses of historical admission data to identify trends and patterns that influenced admission decisions. **Demographic and Geographic Insights** by analyzing student demographics and geographic distribution, I contributed to targeted recruitment strategies, increasing the college's visibility in underrepresented regions and attracting a more diverse student body.

**Interactive Dashboards and Reports** have worked on the dashboard which providing college leadership with real-time access to key admission metrics. These visualizations facilitates data-driven decision-making and enhanced transparency across departments. working on **web development, excel, power bi, data visualization, data cleaning**.
